

How ODINT consulting help an E-commerce platform that was looking to increase sales and customers for their site.

## BACKGROUND

An e-commerce site, approach us to make its quality felt, pushed us to go with answers to smooth out their organization. We use Artificial Intelligence (AI) to identify fake reviews and other different things. Using AI, online business stages developed a strong organization for correspondence, request answering similarly as well as complain resolutions with our organizations and expert assistance, this e-commerce retailer had the option to promote its arrangements by using AI that helped them with understanding them to understand their latent patrons well.

## HOW WE APPROACHED:

1

### Using Artificial Intelligence

Our specialist team used AI to detect counterfeit surveys, overseeing huge information in addition to other things

2

### Resolution

With our specialists, we created correspondence answering and complaints resolution

3

### Answering queries

Using AI, e-commerce platforms start query answering as well as to complain resolutions.

4

### No Slack or errors

Aside from this, utilizing our AI, choices were made reliant on the patron's query which helped in executing an activity with no slack or errors

## HOW WE APPROACHED:

### ➤ Services and master help

The e-commerce was able to grow its sales and understand its potential customers by using Artificial Intelligence.

### ➤ ODINT's AI solution

Using our AI solution, they were able to deal with online buyers.

### ➤ Provided information

We provided information as per need.

### ➤ Continual returning to the site

They continually return to the site for a different substance.
